

Master Key System

Smart, Scalable, Super-Efficient

Mul-T-Lock® Master Key Solution

A master key system is a key plan where selected keys can open a number of predefined doors. These keys work with different types of door locks, cabinet locks, padlocks, etc., as long as the cylinder inside them is of the same keyway.

What is a master key?

In a Master Keyed system, a master key opens all the locks in the system although each lock also has its own unique key. This permits organizing master key systems along departmental or other functional lines to allow supervisory or emergency access.

What does a master key unlock?

Master keys make it possible to unlock multiple locks with one key. They allow you access to multiple doors in buildings and make it much easier on those needing access. A good example of how master keys work is found within an office building.

Mul-T-Lock® offers a wide range of master key solutions to address the varying needs of different business sectors and their unique environments.

**From Simple to
Highly Complex,
Master Key Systems
for Every Environment**

Master Key System Benefits

Enhanced Security

With increased control over access and fewer keys that could be lost or stolen.

Cost-effective, Resource Reduction

Through efficiencies and single-key access, you'll need to create and recreate fewer keys.

Customizable

Depending on needs, the Master Key System can be applied to the Mul-T-Lock® High Security platform that is most suitable and to a wide range of products including various lock and cylinder types.

Convenient

Each user has access to what they need and only for what they are authorized, including central doors, internal doors, garage doors, mailboxes, cabinets and more.

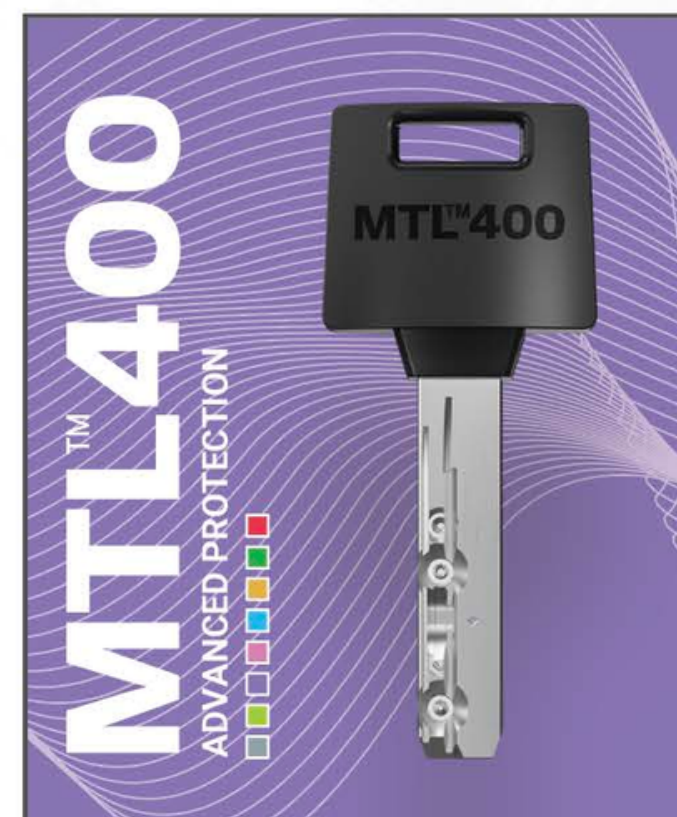

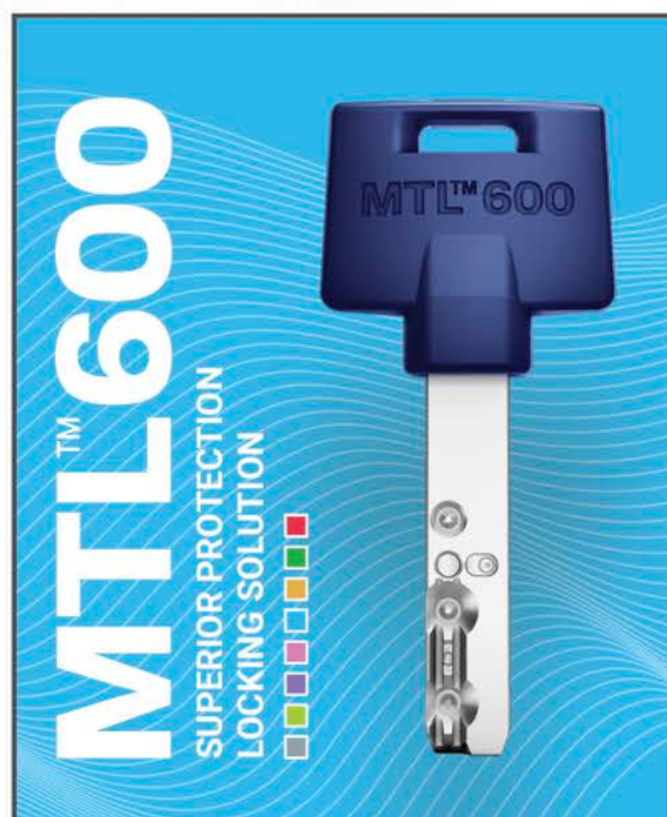

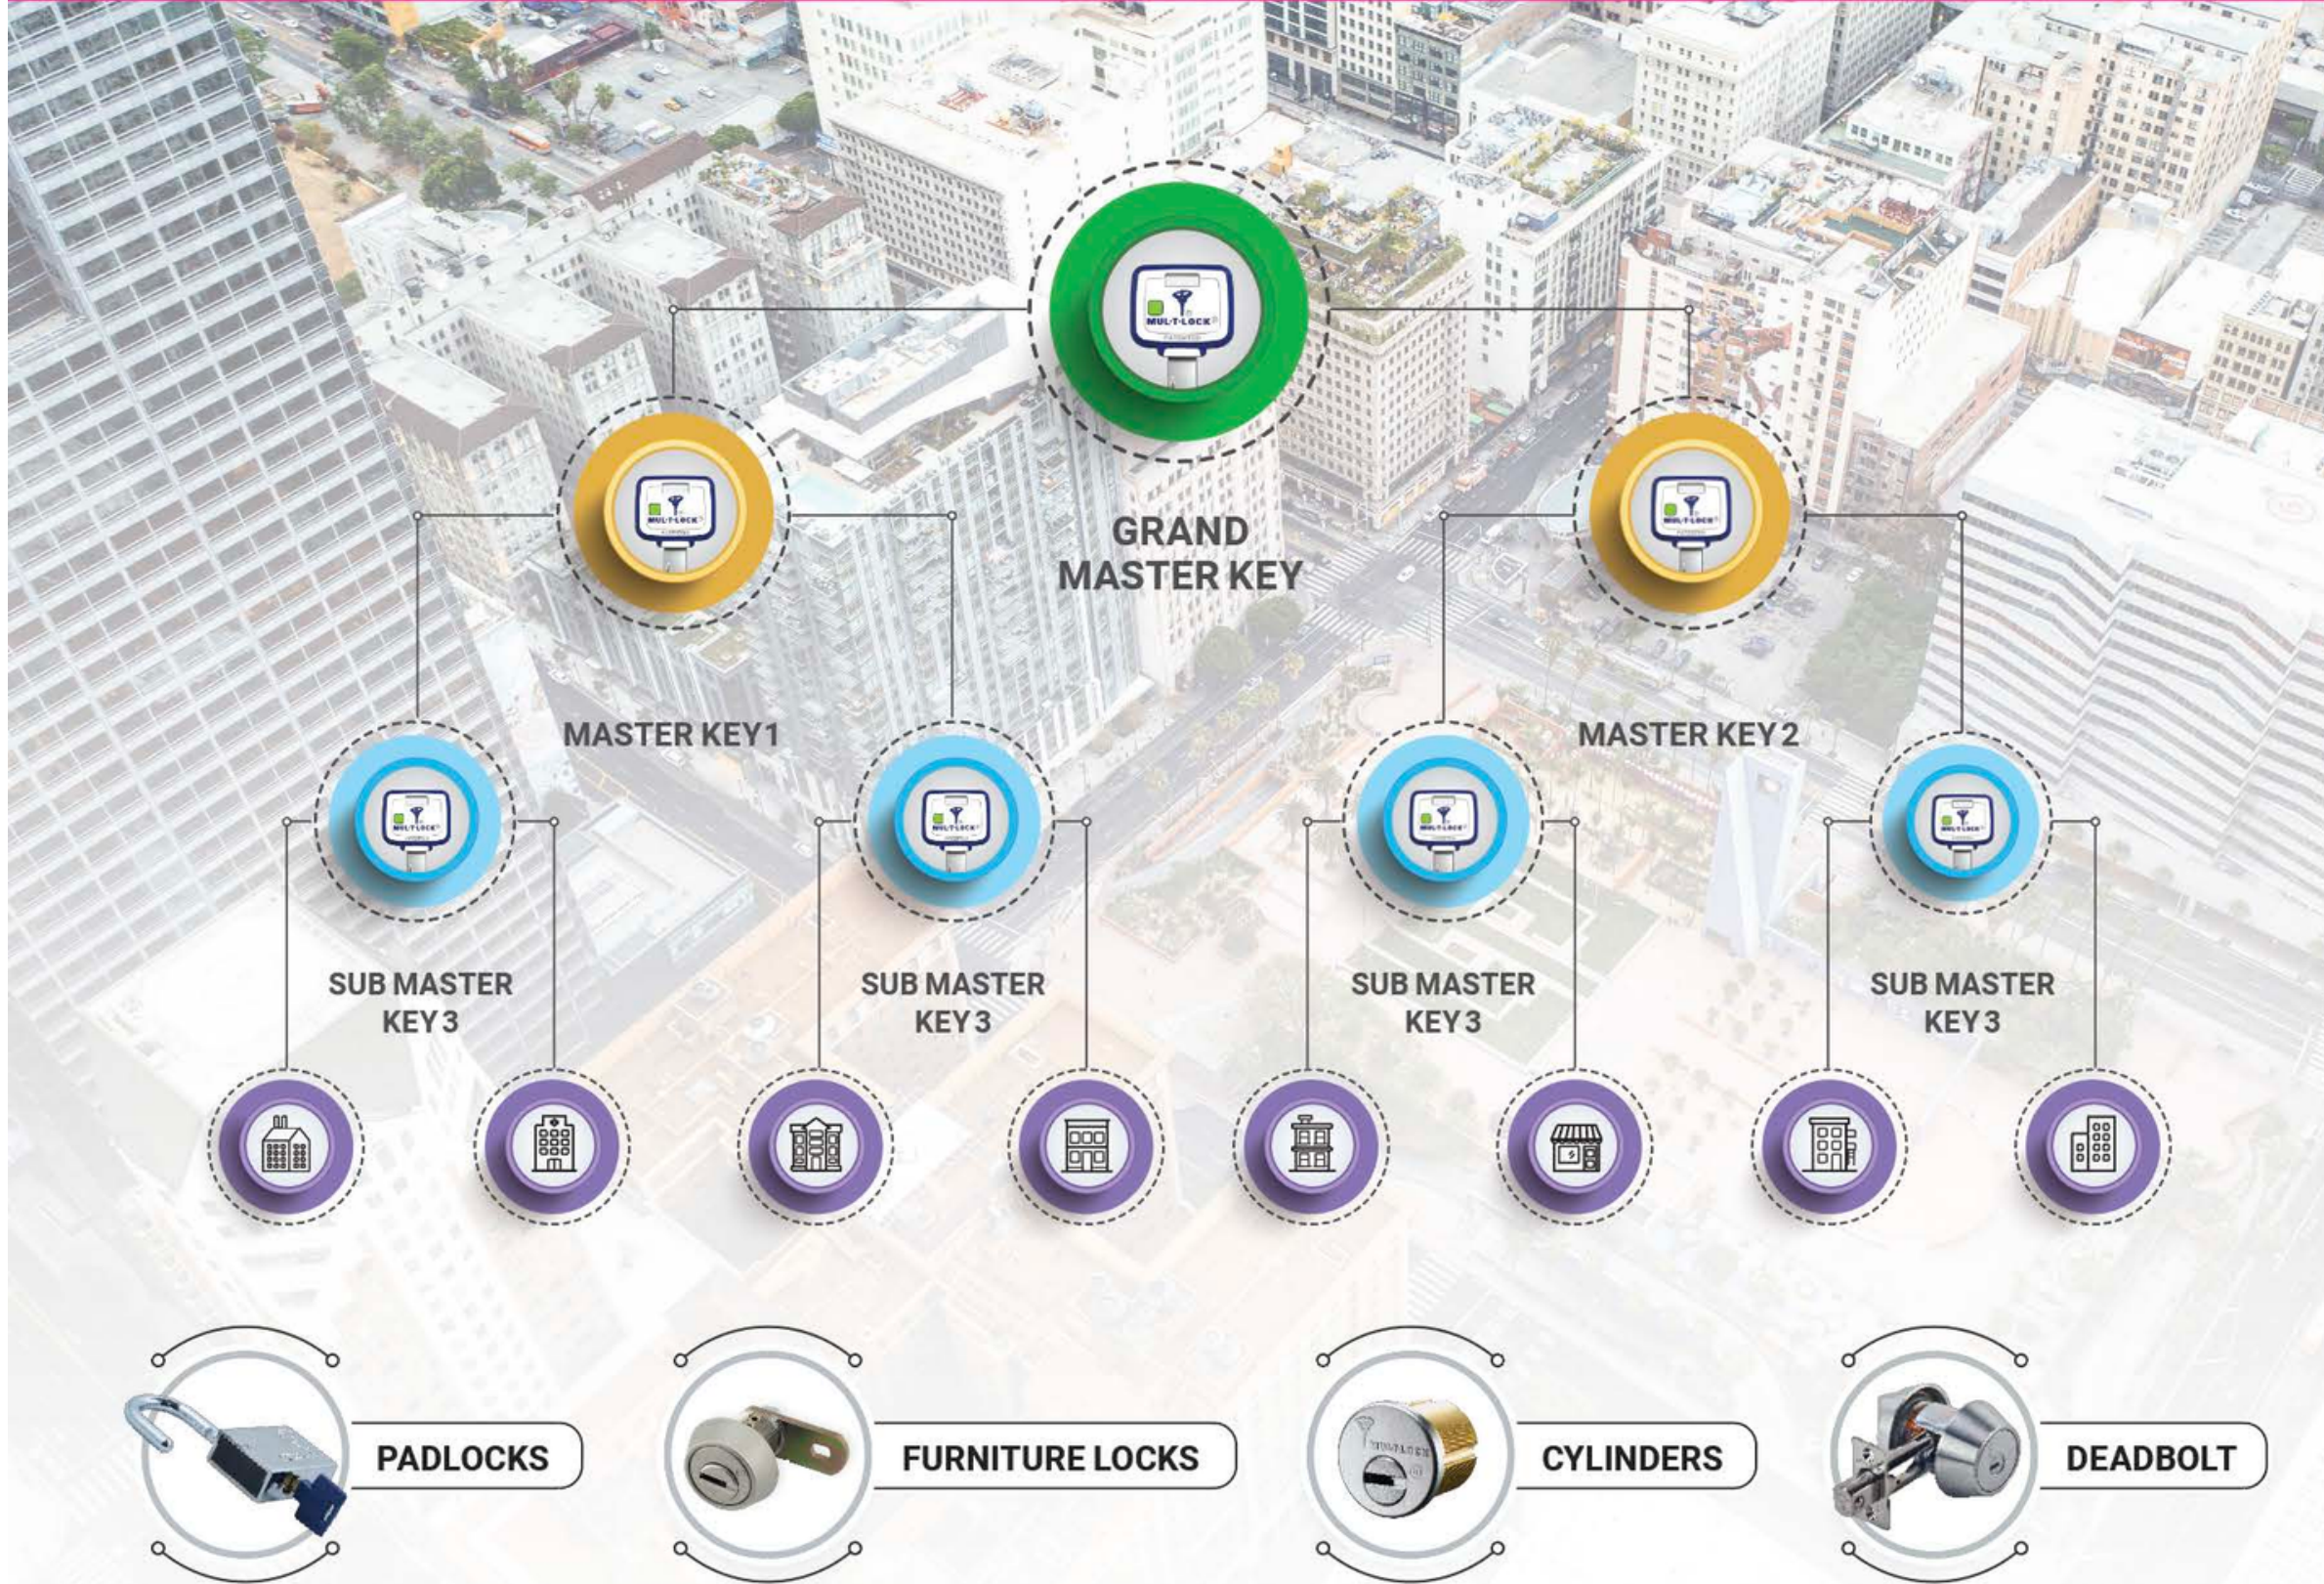

Scalable to Any-Sized Environment

The strength of Mul-T-Lock® solution is designed to serve dynamic and growing environment and to address the security needs of the customer.

Expert Support

Our professionals will help you design, build and maintain master key systems (MKS) that grow and adapt with you.

CLIQ®

Combined Electronic / Mechanical Systems

In addition to mechanical hardware, systems can be enhanced with electronic locking for an additional layer of security.
